COURSE OUTCOMES

1. **Improved Preparedness:** Participants will develop a thorough understanding of common medical emergencies that can occur in dental practice and will be equipped with the knowledge to recognize and effectively manage these situations.
2. **Enhanced Skills:** Through hands-on workshops and simulation exercises, attendees will gain practical skills in basic life support (BLS), including cardiopulmonary resuscitation (CPR), airway management, and administration of emergency medications.
3. **Increased Confidence:** Practitioners will feel more confident and competent in their ability to respond to medical emergencies, resulting in better patient outcomes and reduced anxiety for both dental professionals and patients.
4. **Effective Team Response:** The program will emphasize the importance of teamwork and communication during emergency situations, allowing dental staff to work cohesively to provide timely and coordinated care to patients in distress.
5. **Risk Mitigation:** Participants will learn preventive measures and risk mitigation strategies to minimize the occurrence of medical emergencies in the dental office, promoting a safer environment for both patients and staff

SUMMARY REPORT**DS ADC 2206**

An emergency is a medical condition demanding immediate treatment. Everyone should have the basic knowledge to recognise, assess and manage a potentially life-threatening situation until the patient can be transported to a medical facility. Medical emergencies that have occurred in dental practices include vasovagal syncope, angina, hypoglycaemia, epileptic seizures, choking, asthma, anaphylaxis and cardiac arrest. Anticipation of potential medical emergencies that may arise should be highlighted by taking a thorough medical history which is revised, updated and checked each time the patient presents for treatment. It has been suggested that the presence of an updated medical history may help to minimise the risk of a medical emergency occurring.
