REPORT OF THE EVENT

17.10.2020

Hyderabad

INTRODUCTION:

The World Health Organization provides a mental wellness definition: “A state of well-being in which the individual realizes his or her own abilities, can cope with the normal stresses of life, can work productively and fruitfully, and is able to make a contribution to his or her community.”

Mental health awareness helps people recognize the ways mental illness affects their lives, educates people about available services, and highlights ways to advocate. Recognition and education are important ways to remove the stigma associated with mental illness.
