DENTISTRY IN PANDEMIC

COURSE SYLLABUS

COURSE DESCRIPTION:

The COVID-19 pandemic has significantly impacted dentistry, necessitating rapid adaptations to ensure patient and staff safety while maintaining essential oral health services. Dental practices implemented stringent infection control protocols, including enhanced PPE, pre-appointment screenings, and air filtration systems to mitigate virus transmission. Tele-dentistry emerged as a crucial tool, enabling remote consultations and triage, reducing the need for in-person visits. Non-urgent procedures were often postponed, prioritizing emergency care to alleviate healthcare system burdens. Despite these challenges, the pandemic spurred innovation, with increased adoption of digital technologies and minimally invasive techniques to limit aerosol generation. As dental practices navigate the post-pandemic landscape, continued emphasis on infection control, patient education, and flexible service delivery models will be essential to sustaining safe and effective care.

COURSE OBJECTIVES:

General objective:

- Develop a safe dental care plan for everyone during COVID-19 pandemic

Specific objectives:

- **Enhance Infection Control:** Equip participants with advanced skills in implementing enhanced infection control protocols.
- **Adapt New Technologies:** Train participants on tele-dentistry and digital tools for remote consultations and minimally invasive techniques.
- **Improve Patient Communication:** Develop strategies for effective patient communication and addressing mental health.
- **Prepare for Future Challenges:** Foster crisis management skills and future preparedness for ongoing high-quality care
