REPORT OF THE EVENT

GRE COACHING - Speaking Fluent English

INTRODUCTION:

Fluency is the ability to speak smoothly and freely. It's that moment when things 'click' and you don't need to pause and think about the pronunciation, grammar, or vocabulary to communicate effectively. English fluency is one of the most common goals among English learners. Job ads often require applicants to be "fluent in English" and, being fluent does not mean not making mistakes, ever. It is about communicating your message across smoothly, *even* if you may make mistakes. You realize that you are fluent when things 'click' and words flow. Again, even if you still make grammar or pronunciation mistakes, you may already be fluent in English!

COURSE OBJECTIVES:

The first objective of teaching English is to develop listening and speaking skills. The other objectives are to build the ability in the student to trace the difference of pronunciation of words and get their correct pronunciations, improve their accent and intonations also the ability to use English correctly in speaking and writing skills.
